Home > Miscellaneous > Watches > Certina Watches Below you can find all models Certina Watches for which we have manuals available. Also view the frequently asked questions at the bottom of the page for useful tips about your product. Is your model not on the list? Please contact us. Is your product defective and the manual offers no solution? Go to a Repair Café for free repair services. Frequently Asked Questions Our support team searches for useful product information and answers to frequently asked questions. If you find an inaccuracy in our frequently asked questions, please let us know by using our contact form. My mechanical watch runs fast, what can I do? Verified This might be caused by exposure to a magnetic field. It can be solved by a demagnetisation process performed by a professional watchmaker. This was helpful (506) What do AM and PM stand for? Verified AM stands for Ante Meridiem and indicates that the time is before midday. PM stands for Post Meridiem and indicates that the time is past midday. This was helpful (455) A battery in my device is oxidized, can I still safely use it? Verified Ja, the device can still be safely used. Firstly, remove the oxidized battery. Never use bare hands to do this. Then clean the battery compartment with a cotton swab dipped in vinegar or lemon juice. Let it dry and insert new batteries. This was helpful (453) What is a 'Chronograph'? Verified A 'Chronograph' is literally a 'writer of time'. The term is used to describe clocks and watches that tell the time of day as well as measure a certain period of time, like a stopwatch. This was helpful (382) What is a quartz movement? Verified Watches and clocks with a quartz movement are driven by a battery. This sends an electric current through quartz crystals that will vibrate. These vibrations are passed on to the movement. Because the vibrations have a fixed frequency, watches and clocks with a quartz movement are extremely precise. This was helpful (256) What is GMT? Verified GMT stands for Greenwich Mean Time (sometimes called UTC, standing for Coordinated Universal Time). It is the time for the longitude 0, that passes through Greenwich near London. This was helpful (254) The path of history is marked with names and dates at significant points along the way. In the records of Swiss watchmaker Certina, the year 1968 marks one such milestone. Today the brand brings the striking look of the 60s back to life, adding a state-of-the-art automatic movement with anti-magnetic Nivachron™ balance spring. With a diameter of 39 mm, the renowned DS PH200M cuts an extremely fine figure on any wrist. Elegant mother of pearl, ceramic and diamonds are perfectly complemented by the favourite (non-)colour of fashionistas the world over, as well as a strap made from sustainable #tide ocean material®. Its ultra-modern automatic calibre and a water resistance of up to 200 metres ensure that this timepiece boasts both precision and power. As a contemporary re-edition, its slightly domed ceramic bezel and scratch-resistant sapphire crystal make the DS PH200M aesthetically pleasing. The automatic Powermatic 80 calibre guarantees reliable precision thanks to its 80-hour power reserve and magnetic field-resistant Nivachron™ balance spring. SHANGHAI SMH WATCH SERVICE CENTER CO., LTD is the official customer service center of Certina China, if you have any questions, please contact our hotline for more information 400-670-2006 Worry-Free Watch Purchases Chrono24 Buyer Protection Has You Covered More information » Classic watches » Certina » Aqua » DS Action » C032.407 Add to compare Add to favourites Query about the product 24 months 5 year warranty for clockwork machinery Ø 43 mm, 13 mm Real size print Steel, interhorn width 21 mm Sapphire, anti-reflective coating; double sided anti-reflective coating Rubber, Diver's extension Unidirectional rotating, minute, Aluminum Hands and indexes, SuperLuminova Mechanical with automatic winding. ETA Powermatic 80.111 placed on ETA C07.111 placed on ETA 2824-2, Power reserve 80h, 21.600 BPH (3Hz), 23 stones, Hacking, Hand winding function. Double-sided winding The same watch in a different design Certina DS Action Diver Automatic Powermatic 80 watch model belongs to the Aqua model line, which, as the name suggests, is intended for water lovers. However, in this case, saying that would be a little disgraceful, since this model is categorized as a dive watch. The model meets the strictest standards for dive watches ISO 6425 and can have the word Diver's on the dial. Water enthusiasts will certainly enjoy the above-standard 300M water resistance and also a set of measures to increase the durability of the watch, the so-called DS Concept. There is also a screw-down crown, a one-sided rotating bezel with a minute scale and a divers' strap extension. The watch glass is sapphire with a double-sided anti-reflective layer that reflects only 3% of incident light. The watch is thus perfectly legible even in direct sunlight. Inside, there is a Swiss mechanical movement Powermatic 80, which is characterized by an extremely long 80-hour power reserve and an accuracy of +/- 5 seconds per day. This movement is really exceptional. Why? You can read about it here.
