security solutions for McAfee, Inc. in his role as Global Director for Critical Infrastructure Markets. He is currently the Director of Strategic Alliances for Wurldtech Security Technologies, where he continues to promote the advancement of embedded security technology in order to better protect SCADA, ICS and other connected, real-time devices. He is a long-time advocate of improved industrial control system cyber security and participates in many Critical Infrastructure industry groups, where he brings a wealth of technology expertise. He has over 20 years of experience in Infomation Technology, specializing in industrial automation technologies, infrastructure security, and applied Ethernet protocols as well as the design and implementation of Intrusion Prevention Systems and Security Information and Event Management systems in both enterprise and industrial networks. In addition to his work in information security, he is an award-winning author of citation. He studied at the University of New Hampshire and the University of London.He can be found on Twitter @ericdknappDirector of Critical Infrastructure Markets for NitroSecurityJoel Langill brings a unique perspective to operational security with over three decades field experience exclusively in industrial automation and control. He has deployed ICS solutions covering most major industry sectors in more than 35 countries encompassing all generations of automated control from pneumatic to cloud-based services. He has been directly involved in automation solutions spanning feasibility, budgeting, front-end engineering design, detailed design, system integration, commissioning, support and legacy system migration. Joel is currently an independent consultant providing a range of services to ICS end-users, system integrators, and governmental agencies worldwide. He works closely with suppliers in both and R&D functions, and developed a specialized training curriculum focused on the applied operational security. Joel founded and maintained the popular security site ICS scadaker.com that offers visitors extensive resources in the understanding, evaluation and security systems security. He developed a specialized training curriculum that focuses on applied cyber, and defenses for industrial systems. Its website and social networks extend to readers in over 100 paanes globally. Joel devotes time to independent research related to the security system of the control system and regularly blogs on the evaluation and security of control systems. His experience and proven skills are encouraged to business relations with vain large companies of the Study. Joel operates on the Advisory Council of SCADA FENCE LTD., works with risk capital companies in the evaluation of industrial security start-up companies, and is a focal point of research from ICS for organization for CERT -Aers around the world. He contributed to Vanios Books on Security, and it was the editor tonic for e oApplied Cyber Security and the Smart Grid. Joel is a member of voting for the Committee Isaa99 on Industrial Security for Control Systems, and was a main contributor to the accounting report Isaa99 on Stuxnet malware. He published Vain reports on ICS -related campaigns, including Heartbleed, Dragonfly and Black Energy. Its certificates include: Certified Ethical Hacker (CEH), Certified Penetration Test (CPT), Certified SCADA SECURITY ARCHITECT (CSSA), and Tã before Functional Safety Engineer (Fsehg). Joel obtained extensive training through the Department of Internal Security of the FEMA Emergency Management Institute, having completed the ICS-400 in the command of incidents and in crisis management. He is graduated from the University of Illinoisã e "Champaign with a BS (bronze in Electrical Engineering. It can be found on Twitter @SCADAhackerHas almost 30 years in in-depth, comprehensive industrial control systems architecture, product development, implementation, upgrade and remediation.Write a review(Total rating for all reviews)Uri G. Sat Dec 22 2018Uri G.A very good book ! It gives a wide view on industrial network cyber security challenges which the industry is facing. The book is very easy to understand for those who are not familiar with the OT world. The chapters are in a sensible order which helps on the one hand to get the general ideas and on the other hand to get the relevant tools in order to transform the ideas into a practical approach. approach.

Standardization or standardisation is the process of implementing and developing technical standards based on the consensus of different parties that include firms, users, interest groups, standards organizations and governments. Standardization can help maximize compatibility, interoperability, safety, repeatability, or quality.It can also facilitate a normalization of formerly ... Harlan Carvey has updated Windows Forensic Analysis Toolkit, now in its fourth edition, to cover Windows 8 systems. The primary focus of this edition is on analyzing Windows 8 systems and processes using free and open-source tools. The book covers live response, file analysis, malware detection, timeline, and much more. Mobile security, or mobile device security, is the protection of smartphones, tablets, and laptops from threats associated with wireless computing. It has become increasingly important in mobile computing.The security of personal and business information now stored on smartphones is of particular concern. More and more users and businesses use smartphones to communicate, ... Modern tactics of espionage and dedicated government intelligence agencies were developed over the course of the late 19th century. A key background to this development was the Great Game, a period denoting the strategic rivalry and conflict that existed between the British Empire and the Russian Empire throughout Central Asia.To counter Russian ambitions in the region ...
